

Pageviews-edits-data-viz-Clean

April 10, 2020

1 Page views time series.

Log scale makes local peaks more visible. Linear scale plots are in plots/pageviews if you want to see them. Note that these are all from article creation through March 2020. Later in the notebook there are plots of only 2019, with both page views and edits time series.

	Unnamed: 0	project	article	granularity	access	\

3 TLCC plots overlaid

...and plots of views vs edits, with significant events. For each article, there is one time-lagged cross-correlation plot (these take into account whole lifespan of article) and a time series plot for each language of just 2019 (edits and page-views).

- Article 370=====

NOTE: There's something stupid going on that prevents me from getting the whole page-views series for the Urdu version of Article 370. I do have all the data somewhere. Will fix this.
